SUMMARY OF THE SCIENTIFIC TRACK

I obtained my PhD in Economics in 2010. Social choice is my main line of research. I work on problems of rationing or failure, analyzing from its three approaches or modes of analysis: the axiomatic, the strategic and the game theory. My academic training in Business Administration and Management, and my doctorate in Economics, doing the Master's in Fundamentals of Economic Analysis, guarantee my training which, together with the ability to work hard and in team, makes me have sufficient vision to relate the theory to its more practical aspect.

Currently, and since my first publication in 2014, I have 24 publications in total: 20 JCR publications, and the rest indexed in SCOPUS, being the 81% of them Q1, and the 57% in D1. My work has generated 199 citations, with an h index of seven and an i10 index of five. In addition, I have three more papers that are under review, with minor comments.

Of all these publications, four are derived from the thesis, and eleven are works independent of my thesis Supervisors (María del Carmen Marco and Josep E. Peris). I have worked and I am working with more than ten different co-authors (not counting my Supervisors) and with four doctoral students, all of them from different affiliations: Rovira i Virgili University (Cori Vilella, Juan Antonio Duro, Antonio Osório, Sebastián Cano, Jordi Andreu), Polytechnic University of Cartagena (María del Carmen Marco, Juan Francisco Sánchez, Pedro Gadea), University of Alicante (Josep E. Peris, Begonia Subiza), University of Barcelona (Jordi Teixidó), Autonomous University of Barcelona Marina Bannikova, former doctoral student), University of Northwestern (Peio Zuazo), Miguel Hernández University (Joaquín Sánchez-Soriano). All this shows my multidisciplinary nature from the defense of my thesis. I would like to emphasize that, apart from the three papers co-authored with my Supervisors during the elaboration of my thesis, in the rest of the published works I am the author of correspondence, denoting my leadership in the elaboration of these papers.

Mention that I have directed three theses defended (one on voting systems, one on distribution issues, another on conflict issues) in addition to being directing three more on industrial organization and environment, and one on tourism and sustainability, and another on sustainable distributions and conflict. Furthermore, I have two recognition of my research activity ("sexenio") for the period 2009-2020.

Regarding my participation in research projects, I would like to highlight my continuous participation in both transversal projects (several universities) and specific ones (the same research group) since 2003, counting one of them as principal investigator.

In relation to my attendance at conferences and seminars, I would like to highlight my collaboration in more than 50 events, both in the organization of workshops and conferences and my participation as a speaker in them. In addition, since the end of 2019 I have been deputy head of a new research center (ECO-SOS) at the URV.

It is also worth mentioning my coordination work in doctorate (secretariat since 2020) and master's degree (coordinator since 2020, committee member since 2016).

Finally, besides being an evaluator and expert member Research Ethics Commission on People, Society and the Environment at URV, I highlight my work as a reviewer in various scientific journals like Economics Bulletin, European Journal of Operational Research, Economic Theory, Physics Letters A, Journal of the Operational Research Society, Ecological Economics, Journal of Operational Research, Society Economic Theory, Climatic Change, Mathematical Social Sciences.
